

Puristic & precious

... because it's not always the color that attracts attention.

Puristic & precious elegance with black colored pencils

Black colored pencils appear quite puristic and precious, and that is also transferred to your advertising message on the pencil.

Due to that, we lacquer the black colored pencils in one of 26 standard colors (from 2.016 pieces in your special color). Combine the black pencil with one of 5 metal caps or choose one of 3 ferrule colors together with one of 15 eraser colors.
